Section Clone Challenge (Medium)

Introduction

In order to make sure we're delivering the best possible results for the end-user, it's essential to build an attractive and efficient user interface that optimizes the user experience.

It's an important skill for a web developer to implement these interfaces in way that aligns perfectly with the designs.

Problem Statement

In our community **GDG Algiers**, we collaborate together to build amazing projects to showcase our innovation, and you will be taking part in the completion of brand new website.

Your task is to implement a section from this project that you will find via this link.

Requirements

- We require a pixel perfect clone of the design in the link above.

Expectations

- We expect an implementation that respects the design with its details (start the prototype to see the animations).

Evaluation

This challenge has maximum points of 9 for implementing all the entire UI.

Notes

- The best implementation of the UI above is gonna be added as a collaboration in our project and the winner will take credit for it.
